SHARIF F. KHAN

May 2, 2009

University Address:

Queen's University Department of Economics Dunning Hall Kingston, ON K7L 3N6, Canada

E-mail: khans@econ.queensu.ca

URL: http://qed.econ.queensu.ca/pub/students/khans/

Mailing Address:

477 Lancaster St. W, Unit 35

Kitchener, Ontario N2K 1L7, Canada

Cell Phone: 613-583-7478 Home Phone: 519-954-3474

Fax: 519-888-1015

Personal Information Citizenship: Canadian

EDUCATION

• Ph.D. in Economics, Queen's University, ON, Canada, expected in June 2009.

- M.A. in Economics, York University, ON, Canada, 1999.
- M.S. Student in Economics, North South University (NSU), Dhaka, Bangladesh, 1997-1998.
- B.S. in Economics, NSU, Dhaka, Bangladesh, 1996.

SUMMER SCHOOLS

• Summer School in "Applied Economics – Programming in MATLAB" (SEEC2008), Department of Economics and Quantitative Methods, University of Lecce, Italy, July 28-Aug 1, 2008.

RESEARCH FIELDS

- **Primary:** Macroeconomics, International Economics and Development.
- **Secondary:** Applied Econometrics, Labor and Public Economics.

DISSERTATION

Title: International Real Business Cycles, Investment-Specific Technology Shocks and Factor Markets Rigidity

Supervisors: Professor Beverly Lapham and Professor Huw Lloyd-Ellis.

JOB MARKET PAPER

A Two-Sector International Real Business Cycles Model with Investment-Specific Technology Shocks

WORKING PAPERS

- International Real Business Cycles, Capital Rigidity and Investment-Specific Technology Shocks
- The Roles of Investment-Specific Technology Shocks and Capital Rigidity in Explaining the Volatility of the Terms of Trade

WORKS IN PROGRESS

- A two-sector real business cycles model with investment-specific technology shocks and limited factor mobility
- A two-sector international real business cycles model with investment-specific technology shocks and limited factor mobility
- International transmissions of the fiscal and monetary policies in a two-sector international business cycles model
- Macroeconomics of Micro-Credit: An Evaluation of Micro-credit Programs in Bangladesh in a dynamic general equilibrium framework

TEACHING FIELDS

- **Graduate:** Macroeconomics, International macroeconomics, International Trade, International Business, International Finance, Trade and Public Policy, Managerial/Business Economics and Development Economics.
- Undergraduate: Macroeconomics, Monetary Economics, Microeconomics, International Economics, International Business, Managerial/Business Economics, Public Economics, Trade and Public Policy, Environmental Economics, Labor Economics, Industrial Organization, Game Theory, Development Economics, Financial Economics, Econometrics/Quantitative Methods, Applied Econometrics, Business Statistics and Mathematical Economics.

TEACHING EXPERIENCE

Instructor for Graduate courses

Fall 2007 Macroeconomics I, Wilfrid Laurier University

Teaching Assistant for Graduate Courses

Fall 2002 International Trade, Queen's University

Instructor for Undergraduate courses

W t 2000	E ' Wife I I will I will I will I will I
Winter 2009	Environmental Economics (two sections), Wilfrid Laurier University
Fall 2008	International Finance (two sections), Wilfrid Laurier University
Summer 2008	Microeconomic Theory II, Wilfrid Laurier University
Summer 2008	International Economics II, York University
Winter 2008	Introductory Microeconomics (correspondence course), Queen's Univ.
Winter 2008	Microeconomic Theory II (two sections), Wilfrid Laurier University
Winter 2008	Advanced Macroeconomics, Wilfrid Laurier University
Fall 2007	Introductory Macroeconomics, (correspondence course), Queen's Univ.
Fall 2007	International Finance, Wilfrid Laurier University
Spring 2007	Macroeconomic Theory, Queen's University
Winter 2007	Macroeconomic Theory, Queen's University
Winter 2007	Introductory Microeconomics (correspondence course), Queen's Univ.
Winter 2007	Economics of Free Trade Areas, York University
Fall 2006	Introductory Macroeconomics, (correspondence course), Queen's Univ.
Summer 2006	Intermediate Macroeconomics II, York University
Summer 2006	Introductory Microeconomics (correspondence course), Queen's Univ.
Winter 2006	Economics of Free Trade Areas, York University
Winter 2006	Microeconomics II, Royal Military College of Canada
Winter 2006	International Monetary Economics, Ryerson University
Winter 2006	International Business, Ryerson University
Winter 2006	Introductory Microeconomics (correspondence course), Queen's Univ.
Fall 2005	Microeconomics I, Royal Military College of Canada
Fall 2005	Introductory Macroeconomics, (correspondence course), Queen's Univ.
Summer 2005	Principles of Macroeconomics, York University
Summer 2005	Introductory Microeconomics (correspondence course), Queen's Univ.
Winter 2005	Public Finance I, Royal Military College of Canada
Winter 2005	Introductory Microeconomics (correspondence course), Queen's Univ.
Fall 2004	International Trade, Royal Military College of Canada
Fall 2004	Introductory Macroeconomics, (correspondence course), Queen's Univ.
Fall 2004	Introductory Macroeconomics, Ryerson University
Summer 2004	Introductory Microeconomics (correspondence course), Queen's Univ.

Teaching Assistant for Undergraduate Courses

Fall 2004	Intermediate Micro-Economics I, York University
1999-2002	International Trade, Topics in Macroeconomic Theory, Economic
	Aspects of Selected Social Issues, Macroeconomic Theory and
	Principles of Economics, Queen's University
1998-1999	Introduction to Microeconomics and Macroeconomics, Intermediate
	Macro-Economics I, International Trade I and Use of Economics
	Data, York University

AWARDS, FELLOWSHIPS AND SCHOLARSHIPS

1999-2003	Queen's Graduate Fellowships, Queen's University
1999-2003	Tuition Fees Bursary, Queen's University
1998-1999	Entrance Scholarship, York University
1998-1999	International Tuition Fee Scholarship, York University
1993-1998	Full Tuition Waiver, North South University
1995-1996	IDESS Fellowship Award, North South University
1993-1996	Dean's List, North South University
1994	President's List of Scholars, North South University
1992	Merit Scholarship, Government of Bangladesh
1990	Merit Scholarship, Government of Bangladesh

CONFERENCE PRESENTATIONS

"A Two-Sector International Real Business Cycles Model with Investment-Specific Technology Shocks"

- Midwest Macroeconomics Meetings, Indiana University in Bloomington, Indiana, May 15 – May 17, 2009. (scheduled)
- Eastern Economic Association Annual Conference, New York city, February 27-March 1, 2009.
- Southern Economic Association Annual Meetings, Washington, D.C., 20-23 November 2008. (scheduled)
- Conference on International Economics and Economics Research, Department of Economics, University of Saskatchewan, October 18, 2008.
- 4th Dynare Conference, Federal Reserve Bank of Boston, September 4-5, 2008. (scheduled)
- Small Open Economies in a Globalized World, 2nd International Conference of Rimini Centre for Economic Analysis, Wilfrid Laurier University, Waterloo, 12-15 June 2008.
- Canadian Economics Association Annual Meeting, Dalhousie University, Halifax, 1-3 June 2007.

"International Real Business Cycles, Capital Rigidity and Investment-Specific Technology Shocks"

- 66th International Atlantic Economic Conference, Montreal, 9-12 October 2008.
- Canadian Economics Association Annual Meeting, University of British Columbia, Vancouver, 6-8 June 2008.

CONFERENCE DISCUSSIONS

- "Rule-of-thumb consumers, productivity and hours," by Francesco Furlanetto and Martin Seneca, Canadian Economics Association Annual Meeting, University of British Columbia, Vancouver, 6-8 June 2008.
- "Reactions of Canadian Interest Rates to Bank of Canada Communications: What Moves Markets?" by Christine Fay and Toni Gravelle, Canadian Economics Association Annual Meeting, University of British Columbia, Vancouver, 6-8 June 2008.

CONFERENCE PARTICIPATIONS

- Canadian Macroconomics Study Group, University of Toronto, Toronto, 7-8 November 2008. (scheduled)
- Society for Economic Dynamics Annual Meeting, MIT, Cambridge (Massachusetts), 10-12 July 2008.
- Midwest Macroeconomics Meetings, University of Pennsylvania, Philadelphia, 8-10 May 2008.
- Money, Financial Institutions and the Real Economy Conference, Ryerson University, Toronto, 3 May 2008.
- QED Frontiers of Macroeconomics Workshop, Queen's University, Kingston, 14 March 2008.
- The Second Annual Laurier Conference on Empirical International Trade, Wilfrid Laurier University, Waterloo, 7-8 March 2008.
- QED Macroeconomics Workshop, Queen's University, Kingston, 23 March 2007.
- Numerically Intensive Economic Policy Analysis, Queen's University, Kingston, 12-13 May 2006.

PROFSSIONAL AFFILIATIONS

American Economic Association, Canadian Economics Association, Econometric Society, Eastern Economic Association, International Atlantic Economic Society and Southern Economic Association.

ABSTRACTS OF THE WORKING PAPERS

"A Two-Sector International Real Business Cycles Model with Investment-Specific Technology Shocks" [JOB MARKET PAPER]

Can investment-specific technology (IST) shocks explain two of the international business cycles puzzles - the consumption/output anomaly and the international comovement puzzle? I construct a set of international business cycles facts which are comparable with the moments calculated from the simulated data of an international real business cycles (IRBC) model with investment-specific technology shocks. I develop a two-country, two-good and two-sector (consumption and investment goods producing sectors) IRBC model with IST and aggregate neutral technology shocks to compare its simulated moments with a new set of international business cycles facts. I use the model to study the roles of IST shocks, aggregate neutral technology shocks and trade in investment goods in explaining the international business cycle facts. In contrast to the existing IRBC models with IST shocks, I find that the aggregate neutral technology shocks are relatively more important in explaining the positive cross-country correlation in output. This is mainly because of the sectoral factor re-allocation effects arising from technology shocks in a two-sector model. IST shocks increases the cross-country correlations in labor and investment. Trade in investment goods increases the crosscountry correlations of output and labor, but it decreases the cross-country correlations of investment spending. Thus, this IRBC model also makes a progress towards solving the consumption/output anomaly and the international co-movement puzzle by explaining the observed strongly positive cross-country correlations in output and labor.

"International Real Business Cycles, Capital Rigidity and Investment-Specific Technology Shocks"

Can investment-specific technology (IST) shocks and the rigidity in the sectoral capital movements explain two of the international business cycles puzzles - the consumption/output anomaly and the international co-movement puzzle? I develop a two-country, two-sector and two-good (consumption and investment goods producing sectors) IRBC model with IST and aggregate neutral technology shocks, and with rigidity in the sectoral capital movements. I compare its simulated moments with the new set of international business cycles facts developed in Khan (2008). I use the model to study the roles of IST shocks, aggregate neutral technology shocks, trade in investment goods and the rigidity in the sectoral capital movements in explaining the international business cycle facts. I find that the rigidity in the sectoral capital movements increases the cross-country correlations of output, labor and investment spending. Thus, this IRBC model addresses the consumption/output anomaly and the international co-movement puzzle.
